RUNNING TRACKS

RUNNING TRACK CONSTRUCTION is our specialty. We have been building state-of-the-art track facilities throughout the Midwest for over 20 years.

We use the latest in **3-D laser guided paving technology** to meet strict tolerances set by the NCAA, IAAF and the NFHS.

We can provide:

- Site assessment
- Maintenance programs
- Design-Build services
- Budgeting and cost analysis
- Design details
- Construction services including:
 - Excavation and removals
 - Aggregate base
 - Concrete flatwork
 - Structural concrete
 - Asphalt paving
 - Rubber surfacing
 - Site general construction
 - Synthetic turf systems

SYNTHETIC TURF FIELDS

SYNTHETIC TURF FIELDS are growing in popularity across the United States. From professional sports teams to universities, high schools to elementary schools, and in public or private facilities, more owners want the utility and playability of artificial turf fields.

Benefits of a new turf field:

- Available to all activities
- No rain outs
- Less maintenance than a grass field
- Safer than traditional sod fields
- Open to the community
- Potential revenue generator
- Host high level events

TENNIS COURTS

TENNIS COURTS have been a part of the Byrne & Jones legacy for over 25 years. Today we build over 60 tennis courts a year including indoor and outdoor facilities.

We use the same laser-guided technology for our tennis court projects. This method delivers **the best surface in the sport**. You can tell when you play on a Byrne & Jones court.

Contact us today for information and pricing on **track and field maintenance and construction, tennis court installation, track surfacing and striping** as well as **total site construction**.

We want to be a part of your design-build team.
